

INVISIONAPP

<http://www.invisionapp.com/>

Unique Features:

- Offers a clean and intuitive interface to create hotspots and includes useful transitions and gestures for a better interactivity. *A unique aspect is its ability to templize the hotspots such that they can be reused in case of multiple similar screens.*
- Enables collaborative review process among a team of designers and allows commenting on the mockup screen itself. This will be a great tool for remotely connected design team and works a lot faster than trying to schedule endless face to face meetings with stakeholders.

Pricing Plans:

Free	Starter	Professional	Team
\$0/month	\$15/month	\$25/month	\$100/month
1 project	3 projects	Unlimited projects	Unlimited projects

FLINTO

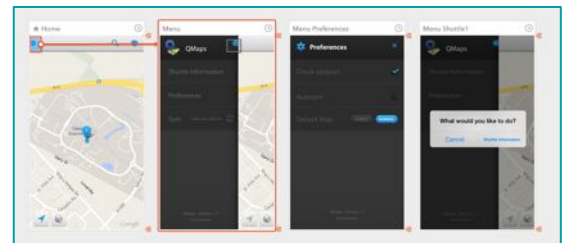

<https://www.flinto.com/>

Unique Features:

Offers a very straightforward interface that acts like a canvas holding the screens. You can simply launch, load screens and connect them to turn them into clickable prototypes.

Pricing Plans:

\$20/month OR \$216 billed annually

XIFFE

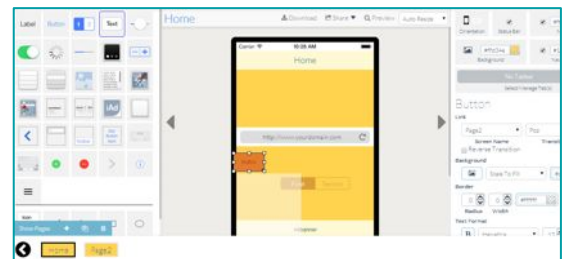

<http://xiffe.com/>

Unique Feature:

Provides a simple interface to create colorful prototypes using the library of UI widgets and color schemes

Pricing Plans:

Basic Plan	Advanced Plan	Team Plan
\$0/month	\$7.99/month	Pricing varies
10 apps	Unlimited apps (10 active)	Unlimited apps (10 active)
10 MB storage	100 MB storage	200 MB storage
		Collaboration

PROTO.IO

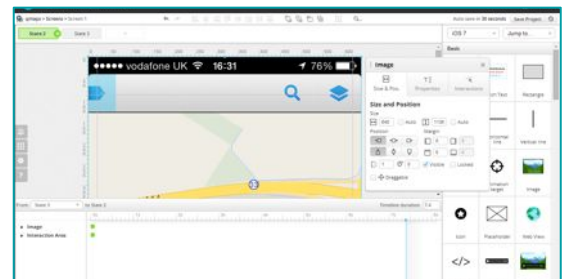

<http://proto.io/>

Unique Features:

- Creates highly interactive prototypes which are quite fluid and the flip between portrait and landscape is handled pretty well.
- Besides transitions and interactions, this tool supports validation of user input (variables) and this feature can be useful while designing applications with math or calculations.

Pricing Plans:

Freelancer	Startup	Agency	Corporate
\$24/month	\$40/month	\$80/month	\$160/month
1 user	up to 2 users	up to 5 users	up to 10 users
5 active projects	10 active projects	15 active projects	30 active projects

POPAPP

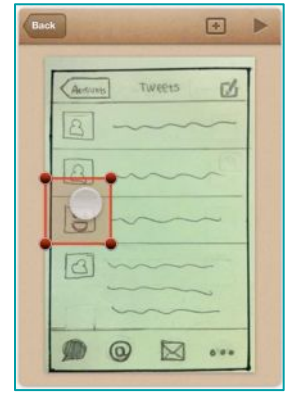

<https://popapp.in>

Unique Features:

- Enables designers to push sketches to the next level because the tool generates mockups from photos taken on the device of hand drawn wire frames.
- Provides easy to place hotspot links over images to simulate transitions from one page to the next.

Pricing Plans:

Free on Apple App Store and Google Play

CONCEPT.LY

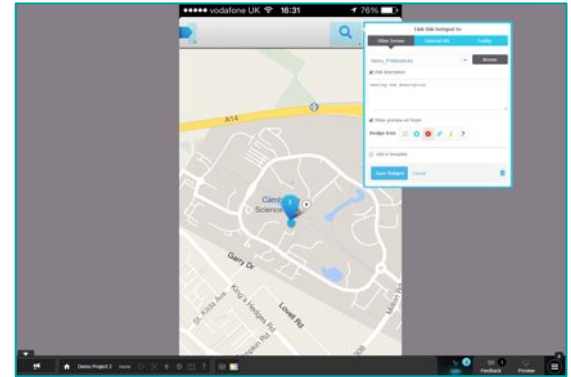

<https://app.concept.ly>

Unique Features:

- Allows designers to link mockup screens with other screens, external websites and even tool tips. An interesting feature is to include a preview and description of the subsequent screen (giving an idea of what to expect when users taps a hotspot).
- Allows reviewers to comment directly on the design and categorize their feedback as a Comment, Idea, Suggestion, or Problem, which helps designers understand the reviewers' perspective of problematic experience.

Pricing Plans:

Free

FIELDTEST

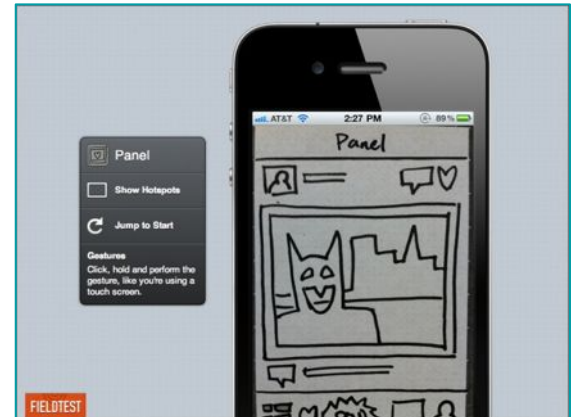

<https://go.fieldtestapp.com>

Unique Features:

- Allows for quick prototyping with simplified interface, provides uploading of pre-designed mockups with options of adding hotspots, transitions and gestures to pages.
- Allows for sharing prototype URLs so clients, users and project teams can access them without the need for an account.

Pricing Plans:

Free	Starter	Starter Plus	Basic	Basic Plus
\$0/month	\$7/month	\$10/month	\$19/month	\$35/month
1 prototype	3 prototypes	5 prototypes	10 prototypes	20 prototypes

FLUID UI

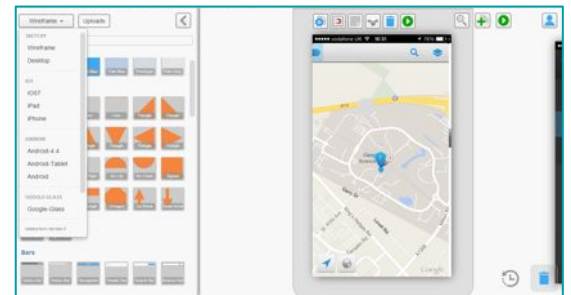

<https://www.fluidui.com/>

Unique Features:

- Allows for designers to build prototypes using their own uploaded images and also create prototypes using elements from the UI widgets library.
- Provides multiple sharing options like QR, Unique URL, E-mail, and Social Media. Further, it also supports exporting the interactive mockups as downloadable.

Pricing Plans:

Lite	Standard	Pro
\$12/month	\$29/month	\$49/month
1 active project	10 active projects	30 active projects

EASEL.IO

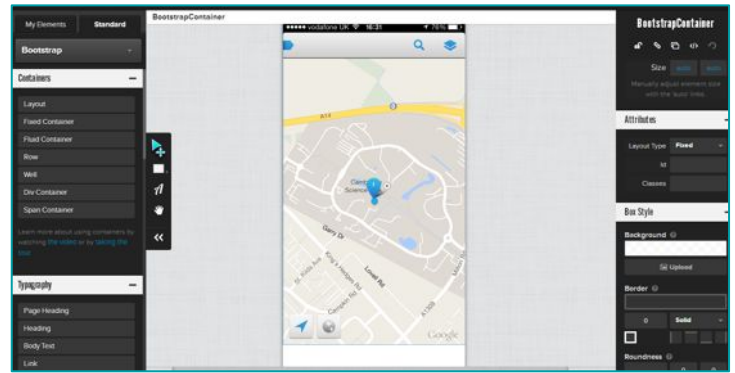

<https://www.easel.io/>

Unique Features:

- Provides a tech savvy interface that includes interface patterns from the Bootstrap framework and offers easier implementation by exporting the whole page to HTML/CSS.
- This is a handy tool for designers with basic web development skills as it offers a higher control over code enabling them to effectively handle responsive design.

Pricing Plans:

Trial	Personal	Freelancer
\$0/month	\$15/month	\$30/month
3 documents	Unlimited documents	Unlimited documents & reviewers Premium support

SOLIDIFY

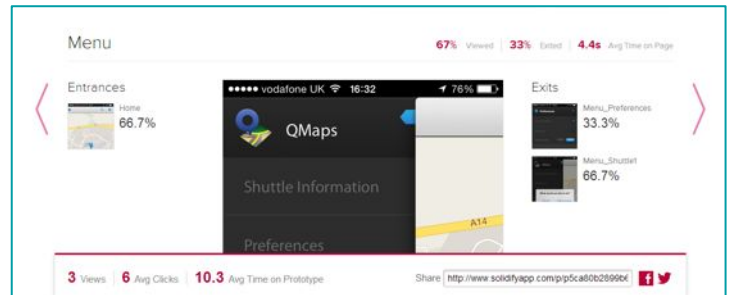

<http://www.solidifyapp.com/>

Unique Features:

- Provides a built-in ability to set up specific tasks to test the user interactions, which gives a realistic validation of user behavior on a mobile device.
- Highlights fundamental stats like 'views, clicks and time-spent' on screens that are indicative of the problematic interactions in the design. Although this can be more useful for websites, translating the analytics in favor of mobile design can prove effective.

Pricing Plans:

Basic	Plus
\$19/month	\$49/month
Unlimited prototypes & users	Unlimited prototypes & users Demographics reports Logo customization Custom PDF reports
